HTML TUTORIAL FOR BEGINNER

Lecture : 1

Short History Of HTML

- HTML was invented in 1990 by a scientist called **TIM BERNERS-LEE.**
- The purpose was to make it easier for scientist at different universities to gain access to each other's research documents.
- The project became a bigger success than Tim Berners-Lee had ever imagined.

HTML

- HTML is the standard markup language for Web pages.
- With HTML you can create your own Website/web App.
- HTML is easy to learn - You will enjoy it!
- It used for web development.
- It is UI (User Interface).
- HTML5 is the latest version of HTML.

HTML (Hypertext Markup Language) is a text-based approach to describing how content contained within an HTML file is structured. This markup tells a web browser how to display text, images and other forms of multimedia on a webpage.

Thank you.
